

Report on Installation of “Bio Fertilizer Production Unit”

A “Bio Fertilizer Production Unit” was installed in the college campus on 4th September 2020 being supported by the ASTEC, DST, Govt. of Assam. Dr. Susmita Sen Gupta, Coordinator, IQAC and Dr. Samuel Sheikh, Coordinator, Environment and Climate Cell of the college were present in the programme. The Unit is aimed to recycle the biomass generated in the campus and produce bio fertilizer for the use in the college nursery and gardens. It is also aimed to inspire the nearby farmer society to undertake the activity and thereby shift to organic farming for the betterment of human health and clean environment. The unit also aimed to undertake demonstration of the activity among the students to aware about the process and benefits of the activity. In view of this, workshops are proposed to be held at the college campus for the farmers, students in the future course of time.
