Environment and Energy Use Policy

B N College, Dhubri

Introduction

The need for energy and fuels is one of the most widespread issues in history and is related to development communities. A society searching sustainable future should use only energy resources that cause no or less environmental effect. The negative environmental impacts of energy sources can be in part overcome through increased energy conservation.

B N College, Dhubri has framed its Environment and Energy usage Policy to manage energy in a systematic manner and to minimize its impact on the environment. The policy aims to explore the renewable energy resources to reduce the burden of the college and to find out substitute natural resources as solutions to the energy crisis.

Objectives

The main objectives of Environment and Energy Usages policy are,

- To assess the energy usage, measure and its impact on the environment.
- To reduce air pollution emissions using environment-friendly vehicles, including bicycles, public transportation and use of pedestrian-friendly roads.
- To fit LED bulbs in the college campus.
- To install photovoltaic solar panels for the generation of alternate energy.
- To develop systematic waste management mechanism.
- To undertake tree plantation as the continuous and permanent project.
- To take additional measures for legitimate energy consumption
- To install rain water harvesting unit.
- To collaborate with the municipal corporation, government/non-government agencies, affiliating university working in the areas of environment, climate, energy efficiency and sustainable development; to establish MOUs with them as and when possible.
- To provide information and training opportunities on energy saving measures.
- To offer opportunities for employees and students to engage in initiatives those contribute to environmental protection.

- To celebrate important commemorative days related to environmental issues to strengthen the environmental awareness, knowledge and skills of staff and students of the college and the community including the feeder schools by undertaking outreach programs.
- To follow alternative route of laboratory procedure as far as possible.
- To periodically undertake various quality audit, namely, Green audit, Energy audit, Environmental audit, etc. and to take necessary action as per recommendations of the respective audit.

Conclusion

The Policy on 'Environment and Energy Uses' has an important role in supporting energy conservation in the college premises as it can produce an adequate environment that finally leads to savings and also helps to impose regulations for proper energy management, promote recycling and energy recovery. The Policy, its objectives and targets will be reviewed on a regular basis.
