Under the project ‘upgradation of water supply arrangement’, a water treatment plant was constructed. The entire college campus including the Boys & Girls’ Hostel now receive treated drinking water after the completion of this project. The project has improved the quality of drinking water in the college campus.

The college campus used to get submerged by rain/flood water due to poor internal drainage system. Besides, the internal roads were also in a bad condition. By using grant from RUSA-I, a part of the internal roads was renovated with coloured paving blocks. This has added a new dimension to the look of the college besides improving the condition of the internal road. The renovation of the drainage system has largely solved the problem of water logging.
